Delivery areas	Hurghada · Ismailia · Fayed · Cairo · Alexandria · North Coast

Services

Guest room & suite furniture

We build the complete room set to the dimensions of the space, so every piece fits the layout and the hotel's character — and the same design can be repeated across a large room count.

- Beds, bases and upholstered headboards (fabric or leather)
- Bedside tables, vanity units, mirrors and hanging units
- Guest room wardrobes, desks and chairs
- Tea and coffee units, side tables and lounge chairs
- Finishes suited to heavy daily use and easy cleaning

Lobby, reception and public areas

The public area is a guest's first impression, so we treat it as one composition: the reception counter, the seating, and the lighting and wall finishes that go with them.

- Reception counters sized to the space, in timber, stone or combined finishes with metal detailing
- Waiting seating and sofas upholstered for long, comfortable use
- Coffee tables, lighting units and display shelving
- Timber wall panelling, slatted screens and concealed storage units

Restaurants, cafés and hospitality seating

Restaurant furniture works long hours and needs more durability. We select frames, fabrics and coating systems based on usage intensity and the type of service.

- Tables and chairs in a range of sizes and heights, indoor and outdoor
- Banquette seating, bar stools and high seating
- Service stands, counters and display units
- Furniture for lounges, terrace and outdoor seating areas

Upholstery and furniture refurbishment

Not every furniture problem needs replacement. Re-upholstery and refurbishment extend the life of existing pieces at lower cost and preserve the character of the property.

- Re-upholstery of sofas, chairs, benches and headboards
- Fabric and leather replacement, foam and frame repair
- Timber repair and preventive maintenance of existing furniture
- Re-upholstering older pieces for reuse in renovation projects

Fitted joinery, painting and finishing

Fitted joinery makes use of awkward spaces and solves difficult room dimensions, while the finish determines how a piece looks after years of use.

- Fitted wardrobes, closets, shelving and storage walls
- Full joinery: doors, partitions, service counters
- Painting, varnishing and scratch-resistant matt or gloss finishes
- Natural wood veneer and standard or project-specific colours

Chalets, holiday villages and outdoor furniture

Seasonal projects in Fayed, the North Coast and Hurghada face different conditions: humidity, sun and intense seasonal use. Choosing the right materials is part of the design.

- Complete chalet furniture: bedrooms, lounge areas and kitchen units
- Outdoor and terrace furniture resistant to weather
- Practical materials that are easy to clean, maintain and store off-season
- Multiple units furnished to the same design and measurements

Delivery areas and track record

Hurghada — Hotels & resorts

Guest rooms, suites and restaurants for hotels and resorts on the Red Sea. The high-humidity environment requires carefully selected materials and coating systems, and fabrics that hold up across seasons of heavy use.

Ismailia — Head office

Our workshop and head office in El Qassasin El Qadima – Qorein El Gedida, El Tell El Kebir. Projects in the city and its districts are delivered from here with close installation follow-up, which simplifies surveying and maintenance.

Fayed — Villages & chalets

Furniture for chalets and holiday villages by the Bitter Lakes. Because use is seasonal, we specify practical pieces that are easy to clean, maintain and store outside the season.

Cairo — Hotels & restaurants

Rooms, restaurants, cafés and reception areas for clients in the capital, including deliveries to agreed dates and installation inside existing buildings.

Alexandria — Hotels & restaurants

Upholstery, refurbishment and indoor/outdoor seating, using materials and finishes suited to coastal humidity and salt air.

North Coast — Chalets & resorts

Furnishing chalets and units in seasonal Mediterranean developments, with consistent measurements across multiple units and finishes that handle sun and seasonal use.

Official invoices are issued, and our registration documents (commercial register, tax card and chamber membership certificate) can be supplied to procurement teams and contractors on request.
